

Grayscale: Equal numeric steps (+20) do not look equally different

Notice: 20→40 looks like a bigger jump than 200→220, though both are +20.

Hue (Rainbow): Equal hue steps do not look equally different

00 01 02 03 04 05 06 07 08 09 10 11

Notice: Some transitions (green→yellow) pop more than others (blue→purple).

Perceptually uniform scale: equal steps look more evenly spaced

00 01 02 03 04 05 06 07 08 09 10 11

Tip: Use perceptually uniform palettes for quantitative data (steps feel even).
